

THE GUEST PORTAL EXPERIENCE

Make the stay easier, without another app to download.

A guest-facing link for arrival information, stay essentials and useful extras. Your management company remains the service provider behind the experience.

CORE FUNCTIONS · SELECTED SCREENS · CLIENT CONTEXT

HostPilot Pro is the software. Mr Property Siam is the founding client example.

September 2026 · A concise sales introduction, not an internal training manual.

THE CORE FUNCTIONS

What it does. Why it matters.

-
- | | | |
|-----------|----------------------------|---|
| 01 | Arrival information | Give guests a place to find their stay details and arrival status before reaching the property. |
|-----------|----------------------------|---|
-
- | | | |
|-----------|------------------------|---|
| 02 | Stay essentials | Present the access information, Wi-Fi and house information supplied by the team. |
|-----------|------------------------|---|
-
- | | | |
|-----------|----------------------------|--|
| 03 | Services and extras | Let guests discover transfers, experiences and in-villa extras with pricing and context. |
|-----------|----------------------------|--|
-
- | | | |
|-----------|----------------------------|--|
| 04 | Office coordination | Service requests still need the team to confirm availability and arrangements. |
|-----------|----------------------------|--|
-

SELECTED PRODUCT VIEW

A simple place to begin the stay.

The guest does not need to see the internal operation.

For guests, simplicity. For the management company, a more consistent way to prepare arrivals and present its services.

HostPilot Pro guest replica. Fictional stay and access details, not a live guest reservation.

A PRACTICAL WORKFLOW

Before arrival. During the stay. When they need more.

01 Prepare the arrival

Present stay details and the arrival information supplied by the team.

02 Find the essentials

Make access details, Wi-Fi and house information easier to find.

03 Request something extra

Show useful services and extras. The office still confirms arrangements.

FOUNDING CLIENT SHOWCASE

HostPilot Pro is the software. Mr Property Siam puts it to work.

MPS is the property management company using the platform in its own operation on Koh Samui. It is the founding operator and client example, not an independent customer testimonial.

Management company

Coordinate the work and keep operational control.

Owner

Understand the property, the money and the work being done.

Guest

Find information and discover services for the stay.

The owner screen comes from the supplied MPS demonstration guide. Ops and guest screens are marketing replicas using fictional records. No live MPS client data is exposed.

THE NEXT CONVERSATION

See the fit before making the move.

Bring your portfolio, current systems and the workflows that matter most. A guided demonstration should establish what is available, what needs configuring and what is not included.

- This is not a replacement for your booking engine or channel manager.
- Access information is supplied by the team; a displayed code does not imply a connected smart lock.
- Requests, supplier confirmation and payment handling depend on your agreed operational setup.
