

FOR PROPERTY MANAGEMENT COMPANIES

One place to run the business behind every stay.

Your channel manager handles distribution. HostPilot Pro brings the day-to-day operation together: properties, people, reservations, money and the experiences you give owners and guests.

CORE FUNCTIONS · SELECTED SCREENS · CLIENT CONTEXT

HostPilot Pro is the software. Mr Property Siam is the founding client example.

September 2026 · A concise sales introduction, not an internal training manual.

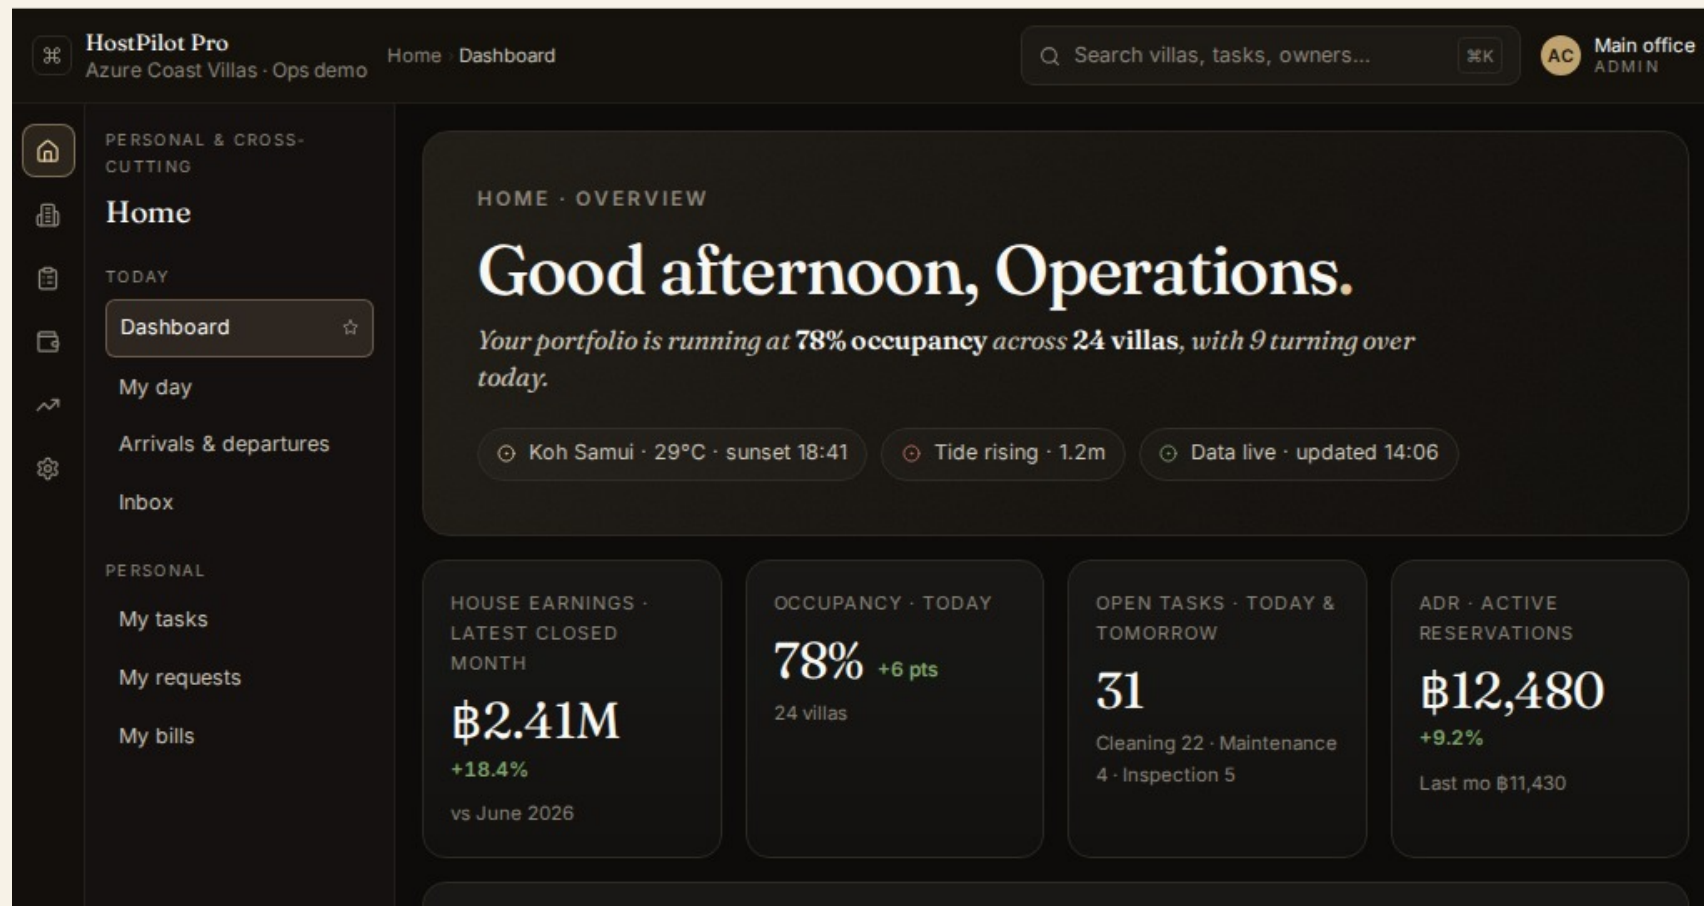

THE CORE FUNCTIONS

What it does. Why it matters.

-
- | | | |
|-----------|-------------------------|---|
| 01 | Daily operations | See arrivals, departures and outstanding work together. Give the office a clear starting point for the day. |
|-----------|-------------------------|---|
-
- | | | |
|-----------|------------------------------------|---|
| 02 | Properties and reservations | Keep property context, owner details and reservation information close to the work they create. |
|-----------|------------------------------------|---|
-
- | | | |
|-----------|----------------------------|--|
| 03 | Team and field work | Coordinate cleaning, pool, garden, maintenance and inspection tasks, with responsibility and progress visible. |
|-----------|----------------------------|--|
-
- | | | |
|-----------|--------------------------|---|
| 04 | Financial control | Review owner statements, bills, balances, petty cash and payment work within the operation. |
|-----------|--------------------------|---|
-
- | | | |
|-----------|--|--|
| 05 | Connected owner and guest service | Use dedicated portals to present the right information to owners and guests, while staff controls stay internal. |
|-----------|--|--|

- 2 / 6

SELECTED PRODUCT VIEW

Start with the operation.

HostPilot Pro operations replica. Fictional portfolio and figures, not MPS production records.

A PRACTICAL WORKFLOW

From the day's priorities to completed work.

01 See what needs attention

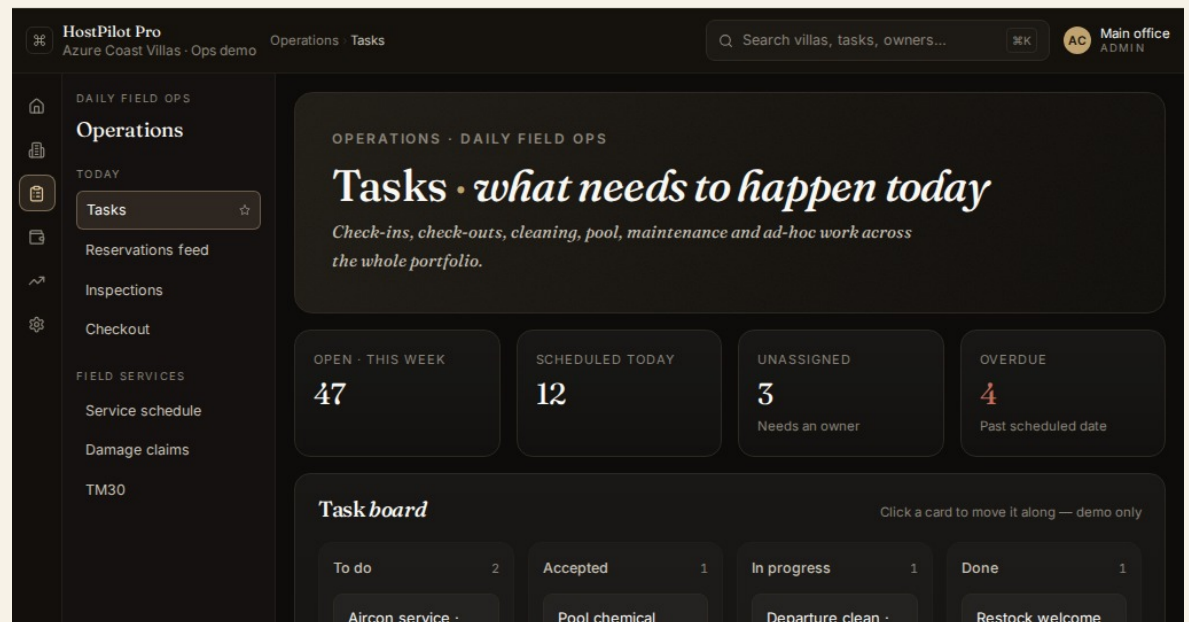

Start with the day's arrivals, departures and open jobs.

02 Coordinate responsibility

Use the task board to connect the job, the property and the people doing the work.

03 Keep a record

Make progress and completion visible to the office.

Selected task-board replica. Fictional jobs; no production actions.

FOUNDING CLIENT SHOWCASE

HostPilot Pro is the software. Mr Property Siam puts it to work.

MPS is the property management company using the platform in its own operation on Koh Samui. It is the founding operator and client example, not an independent customer testimonial.

Management company

Coordinate the work and keep operational control.

Owner

Understand the property, the money and the work being done.

Guest

Find information and discover services for the stay.

The owner screen comes from the supplied MPS demonstration guide. Ops and guest screens are marketing replicas using fictional records. No live MPS client data is exposed.

THE NEXT CONVERSATION

See the fit before making the move.

Bring your portfolio, current systems and the workflows that matter most. A guided demonstration should establish what is available, what needs configuring and what is not included.

- Hostaway is the current channel-manager integration. Other connectors should be discussed, not assumed.
- Operational finance does not replace your accountant, statutory accounts or jurisdiction-specific trust accounting.
- The public demo is illustrative. A guided call should verify your required workflows and deployment scope.
